

Appln. No. 09/736,069  
Amdt. dated November 2, 2005  
Reply to Office Action dated September 20, 2005

IN THE SPECIFICATION

Please amend the paragraph beginning on page 5, line 7 as follows:

In accordance with this invention, and as illustrated in FIG. 2, a bridge is formed between the Internet 170 and a HAVi network 130 via two thin glue layers 220, 260. These glue layers 220, 260 enable symmetric and efficient access of services between the HAVi network [[120]] 130 and the Internet 170. For example, it enables a HAVi-specific browser 230 to access Internet services 180, and allows existing Web browsers 210, such as Netscape or Internet Explorer, to access services 240 provided by the HAVi network 130, and to control devices 250 on the HAVi network 130.
